# Veritas Trade Up:

Save on a new Veritas 5250 NetBackup Appliance.

PROTECTION

**TURN THE NETBACKUP™ APPLIANCE
YOU HAVE INTO THE ONE YOU WANT.**

For a limited time, you can trade in your Veritas/Symantec NetBackup 5230 and 5240 Appliances.

The trade up to a new Veritas NetBackup 5250 Appliance and save with reduced maintenance cost, consolidated rackspace and lower power requirements.

Many previous-generation systems are now entering Extended Appliance Support. Taking advantage of the Veritas trade-up offer ensures you're fully supported for 5+ years and can take advantage of all the latest NetBackup software features and the new capabilities of the 5250 Appliance.

The NetBackup 5250 adds up to 8 channels of 25 GB Optical Ethernet to maximize backup and recovery performance. Up to 10 GB Fibre Channel ports add to I/O flexibility.

Veritas makes it easy to turn the NetBackup Appliance you have into the one you want. Use our wide range of migration services and self-service tools to transition your current data and configurations from older Symantec systems to a new Veritas Appliance.

Contact your Veritas account representative to learn how you can take advantage of this trade-up offer and ensure your data protection infrastructure is ready for today's rapidly changing business environment.
