BeyondTrust

UNIVERSAL PRIVILEGE MANAGEMENT

PROTECT EVERY PRIVILEGE, EVERY TIME, ACROSS YOUR ENTIRE UNIVERSE

The BeyondTrust Universal Privilege Management approach secures and protects privileges across every user, session, and asset, giving organizations the visibility and control they need to reduce risk, achieve compliance, and boost operational performance.

PRIVILEGED ACCESS MANAGEMENT SOLUTIONS

Our integrated products and platform offer the industry's most advanced PAM solution, enabling organizations to quickly shrink their attack surface across traditional, cloud, and hybrid environments.

SECURE REMOTE ACCESS

Secure, manage, and audit remote privileged access sessions for vendors, admins and the service desk

ENDPOINT PRIVILEGE MANAGEMENT

Remove excessive end user privileges on Windows, Mac, Unix, Linux and network devices

PRIVILEGED PASSWORD MANAGEMENT

Discover, manage, audit, and monitor privileged accounts and sessions of all types

CLOUD PRIVILEGE PROTECTION

Discover, visualize, and manage entitlements across your multi-cloud infrastructure

SECURITY SOLUTIONS THAT DRIVE YOUR BUSINESS

Secure and protect privileges across passwords, access, and endpoints to stop data breaches and achieve compliance.

Privileged Password Management
Bring All Privileged Accounts Under Management

- Discover, categorize, and auto-onboard privileged accounts of all types
- Achieve complete control and accountability over privileged credentials
- Manage access to secrets and privileged credentials without inhibiting agility in DevOps workflows

Endpoint Privilege Management
Achieve Least Privilege in Days

- Stop malicious attacks, including malware and ransomware, by enforcing least privilege on Windows, Mac, Unix, and Linux systems
- Assign just-in-time (JIT) privileges only to approved applications, scripts, tasks, and commands
- Bridge the security gap between Windows and Mac, Unix, and Linux by extending Microsoft AD

Secure Remote Access
Enable Vendor and Remote Access

- Connect from anywhere, to anywhere, to any device – no VPN required
- Deploy flexibly from a SaaS, cloud-hosted PAM solution, or on-premises
- Create unimpeachable audit trails and reports, and monitor sessions in real time

Cloud Privilege Protection
Manage All Cloud Entitlements

- Discover, visualize and manage all permissions to access resources across multicloud environments
- Adjust entitlements across multicloud platforms from a single interface
- Leverage recommendations to control excess privileges

USE CASES

Defend against threats related to stolen credentials, misused privileges, and unwanted remote access.

Cloud Security

Ransomware
