

# IBM FLASHSYSTEMS

Smart. Secure. Always On Storage  
for the Modern Enterprise

## IBM FlashSystem: Intelligent Storage for a Resilient Future

IBM FlashSystem provides a powerful, AI driven storage foundation designed to simplify operations, strengthen cyber resilience, and deliver consistent high performance across hybrid environments.

### AI Powered Cyber Resilience

Detect ransomware in under a minute, with real time anomaly detection analysing every I/O pattern.

### Autonomous Storage Management

The latest 5600, 7600, and 9600 models introduce FlashSystem.ai, enabling self optimising, self healing, autonomous operations.

### Ultra Low Latency Performance

Leveraging NVMe acceleration and FlashCore Modules for consistently fast workloads across on prem and cloud.

### Hybrid Cloud Ready

Built on IBM Storage Virtualise, enabling unified management, integrated data services, and flexible scaling.

## The Power of the Partnership

Highly skilled IBM Business Partners, in collaboration with their preferred IBM distributor, First Distribution, provide organisations with IBM FlashSystem — a modern, intelligent storage backbone that is:

**Secure by design** — With immutable snapshots and accelerated threat detection.

**Simple to operate** — AI reduces manual admin and streamlines daily tasks.

**Optimised for cost and energy** — Next gen FlashCore technology boosts efficiency.

**Ready for AI and data driven workloads** — Built for analytics, automation, and hybrid cloud demands.

## Build a Smarter, More Resilient Digital Core.

Speak to First Distribution to explore IBM FlashSystem solutions for your business. We will connect you with a Business Partner that is highly skilled and ready to support you on your IBM Data Resilience journey.
